

Magali Fabri

WEB
DEVELOPER

 magalifabri.netlify.app

 github.com/magalifabri

 magali_90@live.nl

I'm a budding web developer with a strong attraction to clean design and cleaner code. With a critical eye for detail and buckets of hard work, I aim to build things that are a pleasure to view and interact with.

Noteworthy Projects

Gitlery creates a gallery with screenshots found in a GitHub user's repositories. Modal windows provide additional information on the repository's project. Built with: ReactJS, Node.js + Express backend, PostgreSQL database, data from GitHub API, web scraping with node-fetch and cheerio.

BananaPrint is a mock site to connect people with printers to people without, for little print jobs in exchange for something small, like a banana. Built with: Laravel backend with extensive authentication capabilities, interactive map made with Mapbox API.

Education

Web Development @ BeCode in Ghent, Belgium

12/2021 - present

Coding @ 19 in Brussels, Belgium

1/2020 - 11/2021

Marketing Economics @ Windesheim in Zwolle, Netherlands

2008 - 2013

Work

Baker @ Delhaize (Brussels, Belgium)

9/2020 - 12/2020

Volunteer @ Boskanter VZW (Brakel, Belgium)

11/2016 - 10/2019

- **Marketing & Communication:** I created a new brand style, set up a new website, made and sent out newsletters, and designed other types of communication material, such as flyers.
- **Baker:** I took over the running of a tiny bakery for which I executed almost all the tasks by myself, from purchasing supplies, to baking, to billing. During this period the profit grew significantly. Towards the end I also trained successors.

Various volunteer jobs (England, France & Belgium)

12/2014 - 11/2016

Skills

Tech Languages

- JavaScript
- PHP
- CSS / Sass
- HTML
- C / C++
- MySQL
- Bash

Frameworks / Libraries

- ReactJS
- Laravel

Tools & Platforms

- Git / GitHub
- Docker
- Netlify
- Heroku

Languages

- English (fluent)
- Dutch (fluent)
